Contents of Volume 315

Vol. 315, Nos. 1–4 **December 10, 2005**

Simulating the fate of water in field soil–crop environment
M. R. Cameira, R. M. Fernando, L. Ahuja and L. Pereira 1
Analytical solution for solute transport resulting from instantaneous injection in streams with transient storage
F. De Smedt, W. Brevis and P. Debels 25
Stratigraphic controls on pool formation in a domed bog inferred from ground penetrating radar (GPR)
X. Comas, L. Slater and A. Reeve 40
A field scale study of pumping-induced drainage and recovery in an unconfined aquifer
M. J. Bevan, A. L. Endres, D. L. Rudolph and G. Parkin 52
Sensitivity analysis of a catchment-scale nitrogen model
N. McIntyre, B. Jackson, A. J. Wade, D. Butterfield and H. S. Wheater 71
A field study of hydraulic, geochemical and stable isotope relationships in a coastal wetlands system
S. Marimuthu, D. A. Reynolds and C. L. G. L. Salle 93
A simple algorithm to estimate evapotranspiration from DAIS data: Application to the DAISEX campaigns
J. A. Sobrino, M. Gómez, J. C. Jiménez-Muñoz, A. Olioso and G. Chehbouni 117
Spatially distributed energy balance snowmelt modelling in a mountainous river basin: estimation of meteorological inputs and verification of model results
D. C. Garen and D. Marks 126
Change of interception process due to the succession from Japanese red pine to evergreen oak
S. Iida, T. Tanaka and M. Sugita 154
Estimating cell-to-cell land surface drainage paths from digital channel networks, with an application to the Amazon basin
E. Mayorga, M. G. Logsdon, M. V. R. Ballester and J. E. Richey 167
Uncertainty of simulated catchment runoff response in the presence of threshold processes: Role of initial soil moisture and precipitation
E. Zehe, R. Becker, A. Bárdossy and E. Plate 183
Considerations for the use of radar-derived precipitation estimates in determining return intervals for extreme areal precipitation amounts
R. J. Allen and A. T. DeGaetano 203
Transport rate-based model for overland flow and solute transport: Parameter estimation and process simulation
Z.-Q. Deng, J. L. M. P. de Lima and V. P. Singh 220
An artificial neural network model for generating hydrograph from hydro-meteorological parameters
S. Ahmad and S. P. Simonovic 236
Numerical simulation of the wind-driven rainfall distribution over small-scale topography in space and time
B. Blocken, J. Carmeliet and J. Poesen 252
Energy dynamics and modeled evapotranspiration from a wet tropical forest in Costa Rica
H. W. Loescher, H. L. Gholz, J. M. Jacobs and S. F. Oberbauer 274
Visualization of storm severity
M. H. Ramos, J.-D. Creutin and E. Leblois 295
Recharge velocity and geochemical evolution for the Permo-Triassic Sherwood Sandstone, Northern Ireland
A. A. Cronin, J. A. C. Barth, T. Elliot and R. M. Kalin 308

doi:10.1016/S0022-1694(05)00523-8
